

Notification Handler

Sonntag, 31. Mai 2020 19:03

Notify ()

- write over UART
- identify whether is critical error. Two Functions. /
- write a log
- send over ECAT (if available) add it to ECAT SM
- request change color
- notify_done();

List of errors
Critical Error

Non Critical Error
Fault?

- LED lost Error
- No DMA-PWM interrupt (time out)

Todo : Error List
Is there any other SM needed?
Check Temperature / LAN 322 interaction with Event Handler
